

We developed a comprehensively different approach than the simulation industry, research shows transfer of Learn't to learned when the input is received as real (live&dynamic) is significantly enhanced and remembered, whilst simulation/fake is received as gaming theory.

Using 1000s of hours of recorded road user interactions to develop a world leading eLearning system. Our Live&dynamic eLearning training catalogue covers all 17 road user interactions/categories detailed in idrivesafety 5-star Driver Training curriculum. See basic list below or web site for comprehensive listing. DOC:Ids0016

Each road user interaction is a process, which is like a jigsaw puzzle. When you know how the bits fit together the picture can change, yet! The process remains the same. Same process at a different location, in a different car, on a different day.

Anxiety, Autism, Asperger's, Introverts, Extroverts, Artist's, and Engineers are just part of a humans learning style & not a disabler to drivesafety. Idrivesafety eLearning programs change the delivery methodology to match clients learning styles, the journey changes not the outcome. "Driving Beyond the Disability"

Road User Interactions are a Manageable Process

Fear of the unknown is a major causality preventing Learn't becoming learned for many learning styles. More telling does not equal more learning, in fact it has a detrimental impact on many learning styles. The solution is active participation and coaching methodologies empowering clients with a process, self-calibrating Learn't into learned.

Road law is just a set of interactions with definable rules and risks that are manageable regardless of fault. Empowering, challenging & solution driven #elearning delivered to your computer remotely.

idrivesafety the catalyst changing paradigms in the Australian driver training industry.

*NDIS funded courses & ^aPrivate/Fleet Courses. (All training in 30-minute sessions) POA

- ✓ ^aLearner permit eLearning program. **(1on1 with idrivesafety coaches, remote, contactless, Aus. wide)**
- ✓ ^aHazard perception test eLearning programs. **(don't leave home without it)**
- ✓ ^aSenior driver eLearning programs live&dynamic **(age is not a disabler to drivesafety)**
- ✓ ^aLearner driver eLearning programs, **(transferring theory into an action)**
- ✓ ^aFleet advanced driving programs. **("If you can't say it you can't do it")**
- ✓ *NDIS provider specialised driver courses supported by eLearning programs.

Curriculum subjects*(partial list)

- Module 5 Road law, unlocking the 6 most misunderstood road laws used daily.
- Module 6 Communication tools, Selection, decision & effective use.
- Module 7 Speed management, safe vs legal
- Module 12 Position on Road A variable requiring Continuous Partial Assessment
- Module 15 Timing is a foundation. Evidence shows not Learn't at learner level.
- Module 16+17+18 Cross Road process, significant crash causality, it's just a process.
- Module 21+22 lane changing high level of continuous partial attention.
- Module 23+24 Traffic lights High Risk Management.
- Module 25 Forward planning, where and what risks are you managing
- Module 26+27+28 Roundabouts are a process not a shape.
- Module 33 Managing Road user interactions, avoidance regardless of fault
- Module 39 Managing traffic flow. Changes the paradigm and nullifies the most common crash.
- Module 40 High crash risk Freeway & Country roads.
- Module 45 Disabilities above shoulders or physical, modified vehicles
