

Welcome, to idrivesafety's award-winning 5-star driver education system. We use an academic curriculum, delivered in a coaching methodology, in a graduated education system, with a safe process for every road user interaction. 52 modules with 900 units of Competency Based Education and Training CBET.

Neurotypical & Neurodiverse personality styles, same outcome different journey.

Introvert-Extrovert, Artist-Engineers, Aspersers-Autism, Anxiety-Risk taking are all just personality styles & can drivesafety. Effective education reduces crashes!

All groups including Learners, Seniors, Disabilities and Fleet drivers can drivesafety. We support the evidence that states "doesn't blame humans for crashes, when it was the ineffective instruction that was the disabler", I don't know what I don't know. A

Disability is not the disabler, an ineffective education system increases crashes!

You will see and feel the idrivesafety difference in as little as one session. Each completed module will provide a foundation that enables you to be competent whilst your confidence is positively influenced when U know U know! not U think U Know?

Less knowledge always leaves the brain with a problem "yeh? but what if? We provide a safe manageable process for every part of the driving journey.

Our training philosophy:

If you're not learning! It's your coaches' fault¹.

Idrivesafety coaches continuously change their delivery to match each clients learning style and needs. Learnt is not learned until it causes a safe action, and each action is automating regardless of situations and distractions.

Expectations of an idrivesafety Driving Coach:

1. Encourage, analyse, empower & challenge each client individually through their journey.
2. Provide a comprehensive driver training system that when completed enables clients to:
 - Successfully drivesafety in every road user interaction, managing distractions.
 - Competently drive injury free regardless of their personality style.
3. Deliver each process in a coaching methodology² matched to your learning style.
4. Select appropriate live and dynamic environments tailored to the outcomes.
5. Deliver the program in a Graduated Education System (GES)
6. Challenge your Foundations in increasing complexity, applying client centered learning ensuring each client learns and develops at their own pace, only the outcome remains the same!

Expectations of our clients:

1. Actively participate.
2. Ensure you manage your training team including any supervising drivers.
3. Complete homework as practice time allows. [Bring your HANDBOOK to all training sessions.](#)

- ✓ Parent/Supervising driver involvement is necessary with this package.
- ✓ Every road user interaction is trained and managed with a safe process, predict & avoid human errors.
- ✓ All training is conducted in live and dynamic environments
- ✓ No last-minute issues before test, trained to level 3 test is level 1.
- ✓ Idrivesafety when the education is effective. Vision zero is achievable

Other Options

- Purchase driver education based on needs. Email admin for options.

Parents/supervising drivers

Parents pass on 7% of their actual thinking, as their driving is automatic. Researching thousands of learners, shows they calibrate their abilities and confidence based on obeying an instructional delivery system or being told what and when to do it, such as "you can go now" which is the same as tips n tricks to pass a test delivered by driving instructors, we all know what the outcome for that system is? **high serious crash rates and personal injuries**. Instruction has no curriculum or standardised process for any road user interaction, each instructor makes up their own version. Evidence shows a very limited learner **competency** even though we hear teens say, "I'm feeling pretty **confident**", we also know it is not their fault! As stated above "don't blame them when we did not teach them effectively". Idrivesafety has the solution.

¹We do a comprehensive drive around Melbourne, hook turns, trams and the additional risks in this environment. The brain needs to manage at a higher level.

²Our abs course has shown remarkable crash reductions in all participants, live and dynamic

³The total delivery will be based on the hours allocated. <http://www.visionzeroinitialive.com/>

⁴Based on your role conditions being accepted and carried out

⁵Hermes report 2011

⁶this is a minimum and changes to meet clients needs and circumstances

⁷All platinum clients have remained crash/injury free in the first 6 months of driving, not just within Australia, but globally, this has shown to be the most dangerous time for new drivers.

⁸Our abs course has shown remarkable crash reductions in all participants, live and dynamic
