

Australia's Most Effective Driver Education Program

Idrivesafety **PLATINUM** Driver Education Package, developed over 7 years as a global research project. Can teens drivesafety? YES they can, Evidence shows our clients are, Why? The 5 Star Driver Education Program has a learnable process for every road user interaction that is guaranteed to reduce crash risks for teen drivers. Idrivesafety released the award-winning curriculum in 2014. The results? Are Literally! life changing. 😊

Platinum Club Package -Rating 1. Call 1800 956 999

1. Idrivesafety, when the curriculum has a learnable safe process for every interaction
2. Idrivesafety, when I have been taught a safe process for every road user interaction
3. Idrivesafety, when each process is self-calibrated, "I will know, when I know!"
4. Idrivesafety, when the training is delivered in a Graduated Education System GES
5. Idrivesafety, whether neurotypical or neurodiverse, same process different person.

The big 6 road user interactions detailed in idrivesafety 70-page handbook.

1. Lane changing (Levels 1 & 2)
 - a. Manage a safe & legal process, even in heavy traffic with multiple lanes, entering traffic from side streets, merging lanes and heavy vehicles are just part of a learned process, blind spots are easy with our education system.
2. Roundabouts (Levels 1 to 3)
 - a. Roundabouts are a process not a shape
 - b. Training is delivered in a Graduated Education System GES
 - c. Very misunderstood but easy to manage when your education is effective
3. Traffic lights (Level 1 & 2)
 - a. A high road user interaction that has a safe process
 - b. Patience is a Learn't human behaviour
 - c. Poor design but there is a safe manageable process
4. Crossroads (Level 1 to 3)
 - a. Learn a simple life changing Gap selection process. Reduce anxiety
 - b. A simple learnable process will change the risk matrix
 - c. Patience is a Learn't human behaviour and a foundation when idrivesafety.
5. Country roads and high speed. Over 70kph
 - a. High speed road use needs to have a foundation recallable in self calibration
 - b. Reading the signs, Why might happen and what do I do
 - c. I don't know what I was never taught
6. Managing Traffic Flows
 - a. Forward planning
 - b. Rear management (the most common crash)
 - c. Continuous Partial Assessment
 - d. Idrivesafety even if they don't.

Introvert. Extrovert. Anxiety. risktaker. Artist. Engineer. Asperger's and ABI are just a learning style not a disabler to idrivesafety.

The Solution.

It is comforting to know they really do drivesafety
Every subject, every risk, delivered in a Graduated Education System GES:

30 X 1-hour training sessions³.

1. Practice periods in between training sessions managed by supervising drivers.
 - 5 1hr foundational sessions, setting up the foundations with parents/supervisors in back seat, team building.
 - 24 1hr sessions delivering all road user interactions from level 1 to 3, parents welcome 😊
 - Comprehensive e-learning support for learners, parents/supervising drivers
 - Defensive driving included cost charged as 2 hours⁵ module 19 (value \$400.00)
 - Driving in Melbourne trams, hook turn course charged as 3 hours⁶ (value \$590.00)
 - Country road drive (night) module 33+40. Significantly reducing the major risk with country roads and high speed.
 - Parent/Supervising driver involvement is necessary, we want to pass on the system.
 - Every road user interaction is trained as a manageable process.
 - You will be able to analyse, predict & avoid human errors as part of a safe process at each road user interaction.
 - All training is conducted in live and dynamic environments whilst being delivered by Australia's most effective driving coaches in a Graduated Education System.

Copy of curriculum contents, all platinum clients receive a free handbook and access to training videos.
