

## Senior Driver Programs

### Occupational Therapist Driving Assessments

Idrivesafety developed a comprehensively different & highly successful approach in assisting Seniors to retain or regain their Licence, keeping it for significantly longer. Impacting access to social events, independence & health and wellbeing.

### Australia's most successful Senior training and assessments

Idrivesafety has a long & highly success history delivering Research Driven Senior Driver Education Programs helping senior clients to regain or retain their Licence, enabling greater independence, social involvement, health & wellbeing. Just because you have not crashed or received a ticket does mean you will pass the test, the solution however is simple.

### Senior clients have the most successful results, when idrivesafety deliver the training & assessments.

Driving is just a standardized process at each of the 5<sup>i</sup> interactions that the brain can learn or relearn when the delivery methodology is tailored & delivered by Australia's highest trained & most successful driving coaches.

Empowering, challenging & solution driven. idrivesafety focus on the solutions. Call or email and let idrivesafety team help you stay independent longer.

Seriously high number of seniors are failing the driving testing because the ineffective instructor system is the problem! not a senior's ability to learn a few simple changes. Research <sup>ii</sup>shows that it is not a human's inability to learn<sup>iii</sup> that's stops learning, it is the ineffective instructional delivery system that focuses on "tell not teach" & "listen not learn".

If you would like to join the 1000s of successful past clients, call our admin and let us help you keep your freedom?
